☐ County Surveyor, ☐ County Engineer			DOCOMENT	IVU.

Statement of Evidence: NORTH QUARTER CORNER SECTION 6, T114N, R39W

The original Public Land Survey was run in 1858 and a wood post was set as a witness post 4.88 chains east of the corner. The corner was in a marshy area.

In 1914, John Norgaard, County Surveyor, set the North Quarter corner on line and at proportionate distances between the section corners. Norgaard placed a stone to mark the corner.

In 1934, Norgaard located the stone again.

On October 20, 1971, the Minnesota Highway Department excavated 8 feet x 12 feet x 3 feet deep and found the stone on centerline of east-west road and on field division north and power line south.

An analysis of the record data compared to 1972 field measurements indicates that the stone is the accepted location of the original Public Land Survey corner.

For details of survey analysis, photographs taken during excavation, and 1972 electronic survey measurements, see Survey Report for S.P. 4203 and 8701 on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
