## Statement of Evidence: EAST QUARTER CORNER SECTION 13, T114N, R40W

The original Public Land Survey was run in 1858 and a wood post was set in a mound with pits and deposits of coal to mark the corner.

In 1884, Jonah Peterman found the original post and placed a stone to mark the corner. In 1890, Peterman found the stone.

On April 16, 1973 the Minnesota Highway Department excavated and found a 12 inch x 12 inch x 4 inch field stone on centerline of north-south road and property lines to the east and west.

An analysis of the record data dating to the original monument provides a continuous chain of perpetuation of the original Public Land Survey corner.

For details of survey analysis and 1972 electronic survey measurements, see Survey Report for S.P. 4203 and 8701 on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
