☐ County Surveyor, ☐ County Engineer	DOCUMENT NO. 162732

## Statement of Evidence: NORTHEAST CORNER SECTION 23, T114N, R40W

The original Public Land Survey was run in 1864 and a wood post was set in a mound with pits to mark the corner.

In 1901 John Norgaard, County Surveyor, found a stone and iron bolt that was set by adjoining farm owners when the mound was still visible. Norgaard set a 6 inch x 6 inch x 24 inch jasper monument.

The Yellow Medicine County Highway Department assumed the corner postion.

On September 28, 1971 the Minnesota Highway Department excavated and found the jasper monument lying on its side. On the east edge of the monument was an old wood post. The post is at centerline of a road to the east and a ditch west and is the P.I. of a north-south road.

An analysis of the record data and 1972 survey measurements indicates that the post is in the accepted position of the original Public Land Survey corner.

For details of survey analysis, photographs taken during excavation, and 1972 electronic survey measurements, see Survey Report for S.P. 4203 and 8701 on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
