☐ County Surveyor, ☐ County Engineer	DOCUMENT NO. 102139

Statement of Evidence: NORTH QUARTER CORNER SECTION 13, T114N, R40W

The original Public Land Survey was run in 1864 and a wood post was set in a mound with pits to mark the corner.

In 1874, Ole Quam located the corner.

In 1890, Jonah Peterman located the corner.

The Railroad Engineers used this corner in platting Hanley Falls. In 1971, the Minnesota Highway Department excavated 6 feet x 6 feet x 3 feet deep (2 feet below natural ground) at road intersection, but no evidence of monumentation was found.

An analysis of the record data compared to 1972 field measurements and the plat of Hanley Falls indicates the obliterated location of the quarter corner. The obliterated location is on the centerline of an east-west road, a road northwest, on the property lines north-south, and in line with the monuments set in the platting of Hanley Falls.

For details of survey analysis and 1972 electronic survey measurements, see Survey Report for S.P. 4203 and 8701 on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
