Register of Deeds Norman J. Opdahl
By Kay Nerdahl, Deputy
DOCUMENT NO. 162746

Statement of Evidence: NORTHEAST CORNER SECTION 13, T114N, R40W

The original Public Land Survey was run in 1858 and a wood post was set in a mound with pits to mark the corner.

In 1884 Jonah Peterman found a stone at the corner.

Peterman also located the stone in 1890.

In 1901 John Norgaard, County Surveyor, found the stone in place, used it in platting Hanley Falls and replaced it with a 6 inch x 6 inch x 24 inch Jasper monument.

County Ditch #41 was built in the 1940's.

The Yellow Medicine County Highway Department found the monument, date unknown.

In 1971 the Minnesota Highway Department excavated 6 feet x 6 feet x 6 feet deep at the road intersection. No evidence of monumentation could be found.

An analysis of the record data compared to 1972 & 1973 field measurements indicates the derivative location of the section corner. The derivative location is on centerline of north-south road and at P.I. in east-west road 0.5 feet north of centerline.

For details of survey analysis and 1972 electronic survey measurements, see Survey Report for S.P. 4203 and 8701 on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
