Opdahl By Kay Nerdall Deputy		
☐ County Surveyor, ☐ County Engineer				DOC	DOCUMENT NO. 103242	

M.H.D. FORM NO. 2105

Statement of Evidence: NORTHEAST CORNER SECTION 17, T115N, R39W, 5TH P.M.

The original Public Land Survey was completed in 1864 by Charles E. Davis and J. W. Webb Jr. and a wood post was set in a mound of dirt with pits to mark the corner.

In 1901, John Norgaard, County Surveyor, found a stone in the intersection of roads which was set by adjacent landowners in the government mound. Norgaard replaced the stone with a 6" x 6" x 24" granite monument at this time.

Records in the County Engineer's Office indicate that this granite monument was found and used as a section corner prior to 1937. The granite monument was found and used as a section corner in 1937 and again in 1959 when an iron was placed over the granite monument.

A 3/8" by 24" iron pin over a $6" \times 6" \times 24"$ granite monument was found during the 1971 excavation for this corner.

An analysis of the record data and field survey measurements indicates that the inplace granite monument has marked the corner for over 70 years, and is accepted as the location of the Public Land Survey corner.

For details of survey analysis and 1973 electronic survey measurements see Survey Report for S.P. 8701-18 from 0.3 miles North of the Yellow Medicine River to Granite Falls on file in the Surveys Section, Minnesota Highway Department, Willman Minnesota.
