Statement of Evidence: EAST QUARTER CORNER SECTION 20, T115N, R39W, 5TH P.M.

The original Public Land Survey was completed in 1864 by Charles E. Davis and J. W. Webb Jr. A wood post was set in a mound of dirt with pits to mark the corner.

An old County Highway map shows the quarter corner located at the point of intersection of tangents of the county road.

The origin of the quarried stone could not be determined.

The position of the quarter corner is indicated by a fence line west, a field division east, the intersection of the centerline tangents of the county road. The extensions of these lines intersect at a common point, i.e., the stone monument that was found inplace.

This stone monument has marked the corner for many years and is accepted as the location of the Public Land Survey corner.

For 1972 electronic survey measurements see Survey Report for S.P. 8701-18 from 0.3 miles North of the Yellow Medicine River to Granite Falls on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
