M.H.D. FORM NO. 2105

Statement of Evidence: EAST QUARTER CORNER SECTION 30, T115N, R39W, 5TH P.M.

The original Public Land Survey was completed in 1864 by Charles E. Davis and J. W. Webb Jr. A wood post was set in a mound of dirt with pits to mark the corner.

In 1916, John Norgaard, County Surveyor, positioned the quarter corner on line with the fence running west. In 1927, he positioned the quarter corner in the same location. In 1937, he positioned the quarter corner on line with the fence running west and on the west edge of an old road grade which was 20 ft. east of the line between the NE and SE section corners.

The origin of the mound of stones, found in the 1972 excavation, could not be determined.

An analysis of the record data compared to the 1972 field measurements indicates the mound of stones is in agreement with past surveys and with present occupation lines and is accepted as the location of the quarter-corner.

For details of survey analysis and the 1972 electronic survey measurements see Survey Report for S.P. 8701-18 from 0.3 miles North of the Yellow Medicine River to Granite Falls on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
