Statement of Evidence: EAST QUARTER CORNER SECTION 16, T115N, R39W, 5th P.M.

The Public Land Survey was completed in 1864 by C. E. Davis and J. W. Webb, Jr. A wood post was set in a mound of dirt with pits to mark the corner.

Jonah Peterman found the post in 1889 when he surveyed Union Cemetery to the east. The position of the quarter corner could not be determined from the resulting deed description of the cemetery.

John Norgaard surveyed the east line of this section in 1895. He did not indicate whether a monument marking the corner was inplace. However, his survey notes indicate that the corner was 0.5 feet north of being midway between section corners.

No record evidence has been found that any type of monument has been set to mark the corner since the original Public Land Survey.

Since the corner falls in a cultivated field and there are no occupation lines in the immediate area to determine the position of the corner on the ground, no excavation was made for this corner. East-west fence lines inplace, which are west of the section line, do not lead to a common position for the corner.

The corner was set at the lost location.

For details of survey analysis, photographs taken, and 1973 electronic survey measurements, see Survey Report for S.P. 8701 from the Yellow Medicine River to Granite Falls on file in the Surveys Section, Minnesota Highway Department, Willmar, Minnesota.
