Statement of Evidence: North Quarter Gor. Sec. 1, Tl15N, R40W

- 1858 The original Public Land Survey of the township line was completed by W. J. Neeley. A wood post was set over deposited coal in a dirt mound with trenches and pits to mark the corner.
- 1913 John Norgaard, County Surveyor, set a stone on line and equal distances between section corners to mark the quarter corner for a survey of Section 36, T116N, R40W.
- 1915 John Norgaard used the same stone for a survey in Section 1.
- 1976 A Minnesota Highway Department survey crew excavated a 3 foot by 6 foot by $2\frac{1}{2}$ foot deep hole and found a 6"x6"x12" stone marking the corner. It is 2.3 feet below the present road surface and about 2 inches below an old road bed in natural ground. The stone is at the centerline of an east/west road, 2 feet east of a north/south fence line north and on line with a north/south field division south.

The stone is accepted as the location of the government corner because it fits occupation lines and has marked the corner for 63 years.

A Minnesota Highway Department cast iron monument was set above the stone and 4 inches below the road surface.

For details of survey analysis and 1976 electronic measurements, see the survey report for S.P. 8702 and S.P. 8706, Jct. T.H. 23 and T.H. 67, 3 miles S.W. of Granite Falls, on file with the Surveys Section, Minnesota Highway Department, Willmar, Minn. 56201.
