Statement of Evidence: North Quarter Cor. Sec. 3, T115N, R40W.

- 1858 The original Public Land Survey of the township line was completed by W. J. Neeley. A wood post was set and coal was deposited in a dirt mound with trenches and pits to mark the corner.
- 1913 John Norgaard, County Surveyor, set a stone midway and on line between section corners for his survey of Section 3.
- 1976 A Minnesota Highway Department survey crew excavated a 3 foot by 6 foot by 2½ foot deep hole to natural ground. There is an old road bed about 2 feet below the present road surface. A 7"x6"x10" stone was found 2½ feet below the present road at the intersection of the centerline of an east/west road and a north/south fence line north. A Minnesota Highway Department cast iron monument was placed above the stone about 3" below the road surface.

The stone is accepted as the location of the government corner because it fits occupation lines and has marked the corner for 63 years.

For details of survey analysis and 1976 electronic measurements, see the survey report for S.P. 8702 and S.P. 8706, Jct. T.H. 23 and T.H. 67, 3 miles S.W. of Granite Falls, on file with the Surveys Section, Minnesota Highway Department, Willmar, Minn. 56201.
