Statement of Evidence: Northeast Cor. Sec. 8, Township 115N, Range 44W

The original Public Land Survey was run in 1871 and a post set in a mound to mark the original corner.

In 1901, John Norgaard, County Surveyor, found a stone in the center of east-west road. Stone had been set by adjacent landowners in the government mound when the area was plain. A 6"x6"x24" Jasper stone monument was placed.

In 1929, Minnesota Highway Department field notes indicate the monument was found in road in line with north-south fence line.

On December 16, 1976, the Minnesota Highway Department placed a cast iron monument using information and ties from right-of-way map and final grading plans. Top of monument down 1" below the surface.

An analysis of the record data indicates the cast iron monument set by the Minnesota Department of Transportation is accepted as the location of the Public Land Survey corner.
