M.H.D. FORM NO. 2105

The original Public Land Survey was run in 1867 and a post set in a mound with charred stakes and pits to mark the original corner.

In 1901, J. Norgaard found a stake in government mound and placed 6"x6"x24" Jasper stone monument.

In 1929, Minnesota Highway Department field notes indicates the 6"x6"x24" monument was found.

In 1959, the Minnesota Highway Department found the Jasper stone monument.

On June 30, 1976 the Minnesota Highway Department dug for and found the Jasper stone monument two feet below surface.

On July 6, 1976, the Minnesota Highway Department placed a cast iron monument over the stone. Top of monument is down two inches below surface.

An analysis of the record data dating to the original monument provides a continuous chain of perpetuation of the original Public Land Survey corner.
