## Statement of Evidence: N.E. Cor. Sec. 10, T115N, R40W

The original Public Land Survey was completed in 1864 by C. E. Davis and J. W. Webb Jr. A wood post was set in a dirt mound with trenches and pits to mark the corner.

In 1901, John Norgaard, the County Surveyor, found a stone in the government mound and set a 6" by 6" by 24" granite monument in the mound to mark the corner.

In 1931, a Minnesota Highway Department survey crew found the granite monument at the section corner. The notes show that the granite monument is 1.4 feet east and 1.4 feet south of the point of intersection of tangents engineer's station 53+20.3 (T.H. 67). The notes also show that the survey crew removed the granite monument but did not show whether or not the monument was replaced.

In 1976, a Mn/DOT survey crew found an iron pin at T.H. 67 P.I. Station 53+20.3. No excavation was made for the section corner because it was felt that nothing was inplace and the P.I. had been perpetuated since 1931.

In 1976, a Mn/DOT survey crew set a cast iron monument 1.4 feet south and 1.4 feet east of said P.I. 53+20.3.

An analysis of the record data provides a continuous chain of perpetuation for the location of the government corner.

For details of survey analysis and 1976 electronic measurements, see the Survey Report for S.P. 8702 and S.P. 8706, Jct. T.H. 23 and T.H. 67 - 3 miles S.W. of Granite Falls, on file with the Surveys Section, Mn/DOT, Willmar, MN, 56201.
