☐ County Engineer

☐ County Surveyor,

## East Quarter Corner of Section 18, Township 115 North, Range 46 West

The Minnesota DNR Bureau of Engineering contacted the following for survey information:

Minnesota Secretary of State's Office

Yellow Medicine County Recorder's Office

Yellow Medicine County Highway Engineer's Office

U. S. General Land Office notes, obtained from the Secretary of State's Office, show the corner marked with a wood post in a raised mound as per instructions.

No resurvey information was obtained for this corner.

2000 May 17, DNR Bureau of Engineering traversed to the area of corner and found its location to be at the intersection of the center of an old north-south road bed and fences east and west. Did not excavate area of corner in search of a monument because no records of a monument being set at corner since the GLO survey was found and area of corner appears to have been cut for road construction.

Computed a position for corner as follows:

on line between adjoining section corners

in line with fences east and west

The computed position for corner was found to be:

on the center of the old north-south road bed

2634.02 feet from the northeast corner of Section 18

2643.08 feet from the southeast corner of Section 18

4.53 feet north of the lost position

Analysis of the above information led the DNR Bureau of Engineering to conclude that the computed position for corner on line between adjoining section corners and in line with fences east and west marks the obliterated location of the corner. Set a 3/4 inch by 24 inch rebar with an aluminum cap stamped "DNR SURVEY MARKER" at the computed position for corner.
