☐ County Surveyor, ☐ County Engineer ☐ County Surveyor, ☐ County Engineer ☐ DOCUMENT NO. 226145

Northeast Corner of Section 32, Township 114 North, Range 46 West

The DNR Bureau of Engineering contacted the following for survey information:

Minnesota Secretary of State's Office

Yellow Medicine County Recorder's Office

Yellow Medicine County Highway Engineer's Office

- U. S. General Land Office notes obtained from the Secretary of State's Office show the corner marked with a wood post in a raised mound as per instructions.
- 1901 Surveyor's Record Book B contains John Norgaard's, County Surveyor, remonumentation notes for section corners in Yellow Medicine County. The following information is stated about corner on page 204:

found the government mound

set a 6 inch by 6 inch by 24 inch long jasper granite level with the ground to mark corner

- May, Surveyor's Record Book, page 214, obtained from the County Recorder's Office, contains a survey by John Norgaard, County Surveyor. Survey shows corner but does not indicate what kind of monument was found or set.
- 1913 A page in a Surveyor's Record Book, obtained from the County Recorder's Office, contains a survey by John
 Norgaard, County Surveyor. Survey shows that a jasper stone monument was found at corner. The corner is shown:

 2644 feet from the north quarter corner of Section 33

 5288 feet from the northeast corner of Section 33
- 1955 Section Corner Tie Book, page 4, obtained from the County Highway Engineer's Office, does not indicate what kind of monument was found or set at corner but the following ties are shown to an assumed location for corner: telephone pole, southwest, 60.2 feet second fence post, northwest, 65.7 feet power pole, northeast, 60.3 feet
- No Section Corner Tie Book, page 4, obtained from the County Highway Engineer's Office, does not indicate what Date kind of monument was found or set at corner but the following ties are shown to it:

corner fence post, northeast, 43.0 feet corner fence post, southeast, 43.9 feet

1959 February 24, Section Corner Tie Book, page 4, obtained from the County Highway Engineer's Office, does not indicate what kind of monument was found or set at corner but the following ties are shown to an assumed location for corner:

power pole, northwest, 69.9 feet power pole, northeast, 60.7 feet telephone pole, southwest, 70.5 feet

- October 10, DNR Bureau of Engineering traversed to the area of corner and found its location to be at the intersection of the center line of north-south County State Aid Highway Number 15 and the center line of an east-west Township Road. Scanned the area of corner with an electronic metal detector but no metal attraction was obtained. Also, searched for but found no evidence of the record ties. Did not excavate area of corner in search of the record granite monument because of the following:
 - A) County State Aid Highway Number 15 is bituminous surfaced
 - B) area of corner is in a fill section of about 5 feet

Set a 3/4 inch by 12 inch rebar with an aluminum cap stamped "DNR SURVEY MARKER" at the intersection of the center line of north-south County State Aid Highway Number 15 and the center line of an east-west Township Road and found it to be:

2648.94 feet from the north quarter corner of Section 33 5300.60 feet from the northeast corner of Section 33

Analysis of the above information led the DNR Bureau of Engineering to conclude that the 3/4 inch by 12 inch rebar with an aluminum cap stamped "MN DNR SURVEY MARKER", set at the intersection of the center line of north-south County State Aid Highway Number 15 and the center line of an east-west Township Road, marks the obliterated location of the corner.
