STATEMENT OF EVIDENCE

North Quarter Corner Section 30, T116N-R39W

1865 Davis \$ Webb were contracted by the United States Government Land Office to perform the Original Public Land Survey in this township. They record in their field

notes, "Set a post for 1/4 section corner in mound \$ pits as per instructions"

1919 John Norgaard, County Surveyor, records in the County Surveyor's Record Book,

page 417, dimensions to this corner position but doesn't mention what type of

monument was found.

Nov. 11, 1931 John Norgaard, County Surveyor, records in the County Surveyor's Record Book,

page 538, dimensions to this corner position but doesn't mention what type of

monument was found.

1961 Minnesota Department of Transportation Highway Right of Way Map No. 3-62A,

notes a "wood stake inp." and dimensions from the highway center line to this

corner position.

March 19, 1998 Duane A. Bonnema, LS 14895, performed a survey in this section, but does not

mention what type of monument was found at this corner position.

Unknown Dates Roy Marihart, LS 19092, performed surveys in this section, but does not mention

what type of monument was found at this corner position.

Nov. 13, 2012 Matthew D. Runke, LS 46171, searched with a metal locator and found a strong

metal reading under large stone at ground level. The location was in a rock pile and we were unable to remove or dig around the large stone to see what the metal reading was. The metal # large stone fit within 1.3' of the 1919 and 1931 Norgaard survey dimensions from the found stones at the northeast and northwest

corner of this section. This position also fits well with the 1961 MNDOT

dimensions to the center line of the Highway. The strong metal reading under a large stone appears to be the best evidence of the location of this corner position and an Iron Rod with a "46169 46171" stamped plastic cap was hammer drilled

into the top of the stone over the metal reading.
