Statement of Evidence

On April 16, 2021, found spike, removed and dug with backhoe. Found a 6"x6" jasper stone 2.6' southwesterly of spike. Placed a 5/8" iron with seal 43844 east side of stone and a 5/8" iron with seal 43844 near road surface above the jasper stone.

On April 16, 2021, Found 1/2" pipe with seal 42300, removed and dug with backhoe. Hole was 8 feet N-S and 6 feet E-W. Found nothing. it was determined that the found pipe was placed using the spike at northwest corner of 17 to establish corner. The spike (now removed) at northwest corner, is 2.6 northeasterly of a found jasper monument. After review and breaking down section 17, I placed corner midway and in centerline of road. This matches the distance to center of section from 1912 survey. This position is 2.78 feet, S 80°50'23" E from position of found capped pipe (now removed).

On April 16, 2021, dug with backhoe midway and on line for recorded stone and found nothing. Set 5/8" iron with seal 43844 midway and on line. it is in the center of the road and in line with occupation north and south.

On April 16, 2021, Found a 3/4" iron pipe midway between section corners and in center of road. Did did not dig for stone because of a buried utility line crossing near dig location. Accepted position of found pipe. If road is ever to be rebuilt, it is recommneded an attempt be made to recover stone.

On April 16, 2021, Found a 5/8" iron with seal midway and on line between section corners and in center of road. Did did not dig for stone because of slough area on both sides of road. Accepted position of found iron.
