In September, 1858, WJ Neely, General Land Office Deputy Surveyor performing the original survey of the subdivision lines set a wood post, deposited coal, made mound trench and pits.

On June 7, 2023, KLJ dug and found a 60d spike down 0.50' on centerline/centerline of the township road intersection. The spike was lifted and no other magnetic draws were present. The 60d spike was reset and accepted as the Northwest Section corner. All Highway Department ties are gone.

On July, 19, 2023, KLJ removed the 60d spike and dug a 3x3x3 hole with a large electric jackhammer and generator and found nothing. KLJ set a \S rebar with MN LS 48258 down 0.50' below grade in the same location as the 60d spike.
