☐ County Surveyor, ☐ County Engineer	DOCUMENT NO.	

The East Corner of Section 17, Township 116 North, Range 39 West of the 5th Principal Meridian.

U.S. General Land Office notes show corner marked a wood post in a mound with pits as per instructions. (1865)

In 1866, W.J. Neely and E.N. Darling established the lines of this township, as per the information on the copy of the original Township Plat as provided by the Register of Deeds. No other information exists was able to be found. Original notes were unable to be found.

On 1-4-12, a survey crew from Ulteig Engineers found and accepted an Illegible capped rebar, and set new ties as shown. Since no public record is available for this monument, it is the opinion of Ulteig Engineers that the location of this monument correctly perpetuates the position of the original corner based upon local use and occupation, as well as corroborative evidence in the form of distances to adjacent corners.

Uteig Engineers contacted the following for survey information:

The DNR Bureau of Engineering contacted the following for survey nformation:

Minnesota Secretary of State's Office

Yellow Medicine County Recorder's Office

Yellow Medicine County Highway Engineer's Office

Montevideo City Engineer's Office

K.B. MacKichan and Associates, Inc. of Redwood Falls

Bonnema Surveys of Willmar

West Central Land Services, Inc. of Willmar

- 1865 U.S General Land Office notes obtained from the Secretary of State's Office show corner marked a wood post in a mound with pits as per instructions. The corner is shown:

 36.78 chains(2427.48') from the northeast corner of Section 32
- June, L.R. Moyer's Field Book 7, page 32, obtained from the Montevideo City Engineer's Office shows a 24" by 16" by 5" stone at corner but does not indicate if found or set. The corner is shown:

2425.5 feet from the northeast corner of Section 32

1105.5 feet from a 12" by 10" by 8" stone at the east sixteenth corner of the southeast quarter of Section 29

1892 June, L.R. Moyer's Field Book 7, page 24, obtained from the Montevideo City Engineer's Office shows a symbol for a monument at corner but does not indicate what was found or set. The corner is shown:

2425.5 feet from the northeast corner of Section 32

1105.5 feet from a post that is on the east line of Section 29

1898 AUDITOR'S SUBDIVISION NO. 1 as surveyed by John Norgaard, County Surveyor, obtained from the County Recorder's Office shows corner but does not indicate what was found or set. The corner is shown:

2427.5 feet from the northeast corner of Section 32

1913 June, page 294 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey does not show corner but a point on the east line of Section 29 and on the center line of a road is shown:

2070 feet from the northeast corner of Section 32

1933 February, page 352 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey shows the east line of Section 29 but no information is given about the Meander Corner.

Meander Corner Number 5 of Section 29, Township 116 North, Range 39 West, Page 2 of 2

No A Certificate of Survey for land in Sections 29 and 32 obtained from West Central Land

Date Services, Inc. shows that an iron monument was found on the east line of Section 29, 505.17 feet from the southeast corner.

Survey also shows that a plastic capped iron pipe was set on the northerly extension of a line from the southeast corner of Section 29 thur the found monument 505.17 feet north. The iron pipe is shown:

1570.36 feet from the southeast corner of Section 29 on the center line of a northwest-southeast Township Road in line with a fence south

No information is given about the meander corner.

1993 October, DNR Bureau of Engineering visited the area of the corner and searched for but found no occupation lines.

Also, visited the area of the east sixteenth corner of the southeast quarter of Section 29 and found numerous boulders that have been placed by quarry operations, therefore did NOT search for record stone.

Searched for and found the record iron pipe on the center line of a road and on the east line of Section 29. The iron pipe was found to be:

2075.83 feet from the northeast corner of Section 32

Computed a position for the meander corner as follows:

- A) on the northerly extension of a line from the northeast corner of Section 32 thru the found iron pipe on the center line of road
- B) 2427.48 feet (GLO distance) from the northeast corner of Section 32

Conducted a field search for the record stone at the computed position for the meander corner as follows:

probed an 8 foot east-west by 10 feet north-south area to a depth of 2 to 3 feet - no stones were found

Analysis of the above information led the DNR Bureau of Engineering to conclude that the computed position using the northeast corner of Section 32 and a found iron pipe on the center of road and on the east line of Section 29 marks the location of the corner. Set a DNR Survey Marker to mark the location of the corner.

East Quarter Corner Section 30, T116N-R39W

1865 Davis \$ Webb were contracted by the United States Government Land Office to

perform the Original Public Land Survey in this township. They record in their field

notes, "Set a post for 1/4 Sec. Cor. with mound \$ pits as per instructions."

Nov. 11, 1931 John Norgaard, County Surveyor, records in the County Surveyor's Record Book,

page 538, dimensions to this corner position but doesn't mention what type of

monument was found.

1961 Minnesota Department of Transportation Highway Right of Way Map No. 3-62A,

shows this corner position but does not mention what type of monument was

found.

Unknown Date Roy Marihart, LS 19092, while performing work in this section, set a Capped Iron

Rod at this corner position.

Nov. 13, 2012 Matthew D. Runke, LS 46171, searched with a metal locator and found a RLS

2.0' North, 2.0' East, 2.0' South, and 2.0' West of the capped Iron rod, which was very difficult due to the rocky ground in this area, and did not find any stones that appeared to be placed by a land surveyor. Runke then searched with a metal locator and probed an area extending 3.0' North, 2.0' East, 2.0' South, and 4.0' West of the location of the straight line and Norgaard prorated distance along the

19092 capped iron rod near this corner position. He probed an area extending

east line of this section. Again due to the rocky ground many stones were probed out 3" to 4" below the ground but no stones that appeared to have been placed by a land surveyor. Roy Marihart was contacted and he used different corner positions for the northeast and southeast corners of this section to place his

monument. After reviewing all the section corner evidence along the east line of

this section, an Iron Rod with a "46169 46171" stamped plastic cap was set midway and on-line between the found stone at the northeast corner and the 5/8" Iron Rod at the southeast corner of this section as was done by Norgaard in his

1931 survey. This position is 15.70' west and 8.43' north of Marihart's Capped

Iron Rod.

Davis \sharp Webb were contracted by the United States Government Land Office to perform the Original Public Land Survey in this township. They record in their field notes, "Set a post for corner to section 19, 20, 29 \sharp 30 in mound with pits as per instructions"

1915

John Norgaard, County Surveyor, records in the County Surveyor's Record Book, page 352, dimensions to this corner position but doesn't mention what type of monument was found.

1919

John Norgaard, County Surveyor, records in the County Surveyor's Record Book, page 417, dimensions to this corner position but doesn't mention what type of monument was found.

Nov. 11, 1931

John Norgaard, County Surveyor, records in the County Surveyor's Record Book, page 538, dimensions to this corner position but doesn't mention what type of monument was found.

Nov. 13, 2012

Matthew D. Runke, LS 46171, searched with a metal locator and did not find any existing monumentation at the corner position. Runke then probed an area extending 4.0' North, 4.0' East, 4.0' South, and 2.0' West of a position developed by using the 1919 \$ 1931 survey dimensions and found monuments along the north line of this section. An 8"x8"x30" square cut stone was found, lying flat just below the slough bottom. This stone is typical of the type of monument John Norgaard would have placed to perpetuate section corner positions, and was apparently set in 1919 as part of his survey. This stone fits well with the 1919 \$ 1931 Norgaard survey dimensions along the north line of this section. The 8"x8"x30" square cut stone appears to be the best evidence of the location of this corner position. An Iron Rod with a "46169 46171" stamped plastic cap was set along the east side of the stone, which was the bottom side of the stone.

Davis \$ Webb were contracted by the United States Government Land Office to perform the Original Public Land Survey in this township. They record in their field

notes, "Set a post for 1/4 section corner in mound & pits as per instructions"

John Norgaard, County Surveyor, records in the County Surveyor's Record Book, page 417, dimensions to this corner position but doesn't mention what type of

monument was found.

1919

Nov. 11, 1931 John Norgaard, County Surveyor, records in the County Surveyor's Record Book,

page 538, dimensions to this corner position but doesn't mention what type of

monument was found.

1961 Minnesota Department of Transportation Highway Right of Way Map No. 3-62A,

notes a "wood stake inp." and dimensions from the highway center line to this

corner position.

March 19, 1998 Duane A. Bonnema, LS 14895, performed a survey in this section, but does not

mention what type of monument was found at this corner position.

Unknown Dates Roy Marihart, LS 19092, performed surveys in this section, but does not mention

what type of monument was found at this corner position.

Nov. 13, 2012 Matthew D. Runke, LS 46171, searched with a metal locator and found a strong metal reading under large stone at ground level. The location was in a rock pile and

we were unable to remove or dig around the large stone to see what the metal reading was. The metal \$ large stone fit within 1.3' of the 1919 and 1931

Norgaard survey dimensions from the found stones at the northeast and northwest corner of this section. This position also fits well with the 1961 MNDOT

dimensions to the center line of the Highway. The strong metal reading under a large stone appears to be the best evidence of the location of this corner position and an Iron Rod with a "46169 46171" stamped plastic cap was hammer drilled

into the top of the stone over the metal reading.

The East Quarter Corner of Section 30, Township 116 North, Range 39 West of the 5th Principal Meridian.

U.S. General Land Office notes show corner marked a wood post in a mound with pits as per instructions. (1865)

In 1865, W.J. Neely established the lines of this township, as per the information on the copy of the original Township Plat as provided by the Register of Deeds. No other information exists was able to be found. Original notes were unable to be found.

On 1-4-12, a survey crew from Ulteig Engineers found and accepted a Rebar with cap #19092, and set new ties as shown. Monument was accepted in a non-filed survey by Roy Marihart. Since no public record is available for this monument, it is the opinion of Ulteig Engineers that the location of this monument correctly perpetuates the position of the original corner based upon local use and occupation, as well as corroborative evidence in the form of distances to adjacent corners.

Uteig Engineers contacted the following for survey information:

Statement of evidence for this corner location is on back of this page.		
I hereby certify that this survey, plan, or report was prepared by me or under my direct supervision and that I am a duly Licensed Land Surveyor under the laws of the state of Minnesota.		
Signature 1/3/14	Typed or Printed Name: Matthew D. Runke Reg. No. 46171	

Northeast Corner Section 31, T116N-R39W

1865 Davis & Webb were contracted by the United States Government Land Office to perform the Original Public Land Survey in this township. They record in their field notes, "Set a post for corner to Sections 29, 30, 31 \$ 32, in mound with pits as per instructions. Bottom of bluffs and enter river bottom." Jan. 1892 County Surveyor's Record Book, page 62, notes they found the "old government corner" and dimensions to this corner position. Nov. 1912 John Norgaard, County Surveyor, records in the County Surveyor's Record Book. page 278, "found jasper stone monument set by me several years ago" and dimensions to this corner position.

> John Norgaard, County Surveyor, records in the County Surveyor's Record Book, page 352, dimensions to this corner position but doesn't mention what type of monument was found.

June 1918 John Norgaard, County Surveyor, records in the County Surveyor's Record Book. page 409, dimensions to this corner position but doesn't mention what type of monument was found.

April 1931 John Norgaard, County Surveyor, records in the County Surveyor's Record Book, page 277, "found jasper stone monument set by me 13 years ago" and dimensions to this corner position.

> John Norgaard, County Surveyor, records in the County Surveyor's Record Book. page 538, dimensions to this corner position but doesn't mention what type of monument was found.

Minnesota Department of Transportation Highway Right of Way Map No. 3-62A, dimensions to this corner position but does not mention what type of monument was found.

Roy Marihart, LS 19092, while doing surveys in Sections 30, 31, and 32 notes "found corner monument" and dimensions to this corner position.

Matthew D. Runke, LS 46171, searched with a metal locator and found a 5/8" iron rod 1.5' deep at this corner position. He also found a 1/2" Iron Rod 18.22' south and 5.05' West of this corner position. Runke then probed an area extending 2.0' North, 2.0' South, 2.0' East and 2.0' West of each Iron Rod and did not find the Norgaard Jasper stone as called for. These Iron Rods land in a tilled field and it appears the stone has been destroyed by the farm tillage. The found 1/2" Iron Rod was used by Marihart for the surveys he performed in Sections 30, 31, \$ 32. There is no record of when the 5/8" Iron rod was set, but it fits very well with all of the County Survey Record dimensions, recorded on surveys done between 1892 \$ 1931. It appears that the 5/8" Iron Rod, is the best evidence as to the location of the section corner, and was left as found.

June 1895 Original Government Land Office survey by Davis & Webb.

Jan. 17, 1905

John Norgaard, County Surveyor, while doing a survey for a "town road" (County Surveyors Record page 189) makes reference to the West 4 post

Section 30.

1900 John Norgaard, County Surveyor, remonumented many section

corners throughout Yellow Medicine County, although he apparently did not remonument the Quarter Corners.

> County Surveyors Record page 403 "E¹/₄ post-Found Iron Rod set by me at equal distance and on line between Section Corner in 1900."

Oct. 25, 1983 Duane A. Bonnema (RLS 14895) found a 2" x 2"

square hollow iron 30" below road surface.
measured 2643± to intersection to North (County
Surveyors Record page 403) and measured 1324±
South to fenceline (County Surveyors Record
page 403.) Accepted as the corner placed by

John Norgaard in 1900.

The DNR Bureau of Engineering contacted the following for survey information:

Minnesota Secretary of State's Office

Yellow Medicine County Recorder's Office

Yellow Medicine County Highway Engineer's Office

Montevideo City Engineer's Office

K.B. MacKichan and Associates, Inc. of Redwood Falls

Bonnema Surveys of Willmar

West Central Land Services, Inc. of Willmar

- 1865 U.S General Land Office notes obtained from the Secretary of State's Office show corner marked a wood post in a mound with pits as per instructions.
- 1891 June, L.R. Moyer's Field Book 7, page 32, obtained from the Montevideo City Engineer's Office shows corner but does not indicate what was found or set. The corner is shown:

 2656.5 feet from the northeast corner of Section 32

1328.25 feet from the north sixteenth corner of the northeast quarter of Section 32

- 1892 June, page 62 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, surveyor not indicated. Survey shows corner but does not indicate what was found or set. The corner is shown:
 - 40.20 chains(2653.20') from the northeast corner of Section 32
 - 20.10 chains(1326.60') from the north sixteenth corner of the northeast quarter of Section 32
- 1893 June, L.R. Moyer's Field Book 7, page 118, obtained from the Montevideo City Engineer's Office shows a post pit and mound at corner but does not indicate if found or set. The corner is shown:
 - 40.26 chains(2657.16') from the northeast corner of Section 32
 - 20.13 chains(1328.58') from the north sixteenth corner of the northeast quarter of Section 32
- 1900 Surveyor's Record Book B contains John Norgaard's, County Surveyor, remonumentation notes for section corners in Yellow Medicine County. Page 53 states that the north quarter corner of Section 32 was used to reestablish the northeast corner of Section 31. A description of what was found or set at the quarter corner is not given.
- 1912 November, page 277 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Norgaard states that he found a stake and stone at corner which he set several years.

North Quarter Corner of Section 32, Township 116 North, Range 39 West, Page 2 of 2

1915 Page 352 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey states that a stone in a government mound was found at corner. The corner is shown:

2642 feet from the center of Section 29

No A Certificate of Survey for land in Sections 29 and 32 obtained from West Central Land Date Services, Inc. shows that an iron monument was found at corner. The corner is shown:

2653.20 feet from the northeast corner of Section 32

1326.60 feet from an iron monument found at the north sixteenth corner of the northeast quarter of Section 32

2646.45 feet from an iron monument found at the center of Section 29 in line with fences north, south and east

1993 October, DNR Bureau of Engineering found a 1/2 inch diameter pipe at corner. Searched for but did not find the record stone - area is covered with numerous sized stones. The iron pipe was found to be:

1 foot east of a north-south fence

in line with a fence east

1326.39 feet from an iron pipe found at the north sixteenth corner of the northeast quarter of Section 32

Analysis of the above information led the DNR Bureau of Engineering to conclude that the found iron pipe marks the location of the corner.

The DNR Bureau of Engineering contacted the following for survey information:

Minnesota Secretary of State's Office

Yellow Medicine County Recorder's Office

Yellow Medicine County Highway Engineer's Office

Montevideo City Engineer's Office

K.B. MacKichan and Associates, Inc. of Redwood Falls

Bonnema Surveys of Willmar

West Central Land Services, Inc. of Willmar

- 1865 U.S General Land Office notes obtained from the Secretary of State's Office show corner marked a wood post in a mound with pits as per instructions.
- 1891 June, L.R. Moyer's Field Book 7, page 32, obtained from the Montevideo City Engineer's Office shows an old post at corner but does not indicate if found or set. The corner is shown:

2425.5 feet from Meander Corner Number 5, which is on the east line of Section 29

1320 feet from a 12" by 10" by 8" stone at the east sixteenth corner of the southeast quarter of Section 29

2656.5 feet from the north quarter corner of Section 32

1328.25 feet from the north sixteenth corner of the northeast quarter of Section 32

- 1892 June, page 62 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, surveyor not indicated. Survey shows corner but does not indicate what was found or set. The corner is shown:
 - 40.20 chains(2653.20') from the north quarter corner of Section 32
 - 20.10 chains(1326.60') from the north sixteenth corner of the northeast quarter of Section 32
 - 40.10 chains(2646.60') from the east quarter corner of Section 32
- 1892 June, L.R. Moyer's Field Book 7, page 24, obtained from the Montevideo City Engineer's Office shows an old post, stones and four pits at corner but does not indicate if found or set. The corner is shown:
 - 2610 feet from the north quarter corner of Section 33
 - 1313 feet from an old mound and stones that are on the north line of Section 33
 - 2425.5 feet from Meander Corner Number 5, which is on the east line of Section 29
 - 1320 feet from a post that is on the east line of Section 29
- 1893 June, L.R. Moyer's Field Book 7, page 118, obtained from the Montevideo City Engineer's Office shows corner but does not indicate what was found or set. The corner is shown:
 - 40.26 chains(2657.16') from the north quarter corner of Section 32
 - 20.13 chains(1328.58') from the north sixteenth corner of the northeast quarter of Section 32

Northeast Corner of Section 32, Township 116 North, Range 39 West, Page 2 of 4

1896 January, page 63 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by Jonah Peterman, County Surveyor. Survey shows a pile of stone with a stake at corner but does not indicate if found or set. The corner is shown:

40.54 chains(2675.64') from the north quarter corner of Section 33

20.27 chains(1337.82') from the north sixteenth corner of the northwest quarter of Section 33

40.00 chains(2640.00') from the east quarter corner of Section 32

1898 AUDITOR'S SUBDIVISION NO. 1 as surveyed by John Norgaard, County Surveyor, obtained from the County Recorder's Office shows corner but does not indicate what was found or set. The corner is shown:

2427.5 feet from Meander Corner Number 5, which is on the east line of Section 29

2640 feet from the north quarter corner of Section 33

1320 feet from the north sixteenth corner of the northwest quarter of Section 33

3240 feet from the southeast corner of Lot B which is on the north line of Section 33

1900 Surveyor's Record Book B contains John Norgaard's, County Surveyor, remonumentation notes for section corners in Yellow Medicine County. A note on page 53 states the following about corner:

found stone and stake in mound all four pits plain, set top of monument level with ground

Norgaard set 6" by 6" by 24" long cut stones for monuments.

December, page 257 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey states that only an iron bolt was found at corner but as the ground was frozen the stone monument may still be in place. The corner is shown:

2640 feet from the north quarter corner of Section 33

1320 feet from the north sixteenth corner of the northwest quarter of Section 33

3240 feet from an iron bolt on the north line of Section 33

- 1912 December, page 281 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey shows corner but does not indicate what was found or set.
- June, page 294 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey shows corner but does not indicate what was found or set. The corner is shown:

2070 feet south of a point which is on the center line of a road and on the east line of Section 29

1552 feet west of a point which is on the center line of a road and on the north line of Section 33

Northeast Corner of Section 32, Township 116 North, Range 39 West, Page 3 of 4

1914 March, page 319 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey states that a stone was found at corner. The corner is shown:

20.00 chains(1320.00') from a stone at the north sixteenth corner of the northwest quarter of Section 33

1915 Page 351 of a Surveyor's Record Book obtained from the County Recorder's Office contains a survey, by John Norgaard, County Surveyor. Survey states that an iron rod and jasper monument were found at corner. The corner is shown:

1320.00 feet from the north sixteenth corner of the northwest quarter of Section 33

No A Certificate of Survey for land in Sections 29 and 32 obtained from West Central Land Date Services, Inc. shows that an iron monument was found at corner. The corner is shown:

2653.20 feet from the north quarter corner of Section 32

1326.60 feet from an iron monument found at the north sixteenth corner of the northeast quarter of Section 32

2606.92 feet from the east quarter corner of Section 32

505.17 feet from an iron monument found on the east line of Section 29

2075.53 feet from a plastic capped iron pipe set on the east line of Section 29

1993 October, DNR Bureau of Engineering visited the area of the corner and found its location to be in an active quarry and therefore all evidence of monuments no longer exist.

Also, visited the area of the east sixteenth corner of the southeast quarter of Section 29 and found numerous boulders that have been placed by quarry operations, therefore did NOT search for record stone.

Located the north quarter corner of Section 32 and a found iron pipe at the north sixteenth corner of the northeast quarter of Section 32. The iron pipe was found to be:

1326.39 feet from the north quarter corner of Section 32

Computed a position for the northeast corner of Section 32 as follows:

- A) on the easterly extension of a line from the north quarter corner of Section 32 thru the found iron pipe at the north sixteenth corner of the northeast quarter of Section 32
- B) 1326.39 feet from the found iron pipe at the north sixteenth corner of the northeast quarter of Section 32

The computed position for the northeast corner of Section 32 was found to be:

2075.83 feet southerly of an iron pipe found on the center line of a road

3244.14 feet westerly of a bolt found next to a corner fence post with fences north and west

1320.43 feet westerly of a corner fence post with fences east and northwest - searched area for record stone but did NOT find it

Northeast Corner of Section 32, Township 116 North, Range 39 West, Page 4 of 4

Analysis of the above information led the DNR Bureau of Engineering to conclude that the computed position using the north quarter corner of Section 32 and a found iron pipe at the north sixteenth corner of the northeast quarter of Section 32 marks the location of the corner. Did not set a monument at the computed position for corner because its location is in an active quarry.

Statement of Evidence:

In 1892 the will car was on split dist. From New To Sw cor's of Sec 32

In 1918 Survey E'ly cor Sec 31-116-39 was located in Rd due 5. of Buy tree (Tree now gone)

IN 1912 The wild cor Sei 32 was indicated at split dist from NW TO Sw cors of See 32

in 1983 nothing was found @ w'l4 cor. I established the corner at equal dist N-S. from a C.I.M. @ Six cor Sec to the computed dist @ Nix cor Sec (Nix cor Sec 32 was poiled by farmer 50 t yrs ago.) dist to w'l4 to ctr Sec Record 1912 is within 1' of record. dist from w'l4 to west approx ctr established in 1918 (2640) is within 1' to a fence line north. The E-W Road @ w'l4 cor has reportedly been reworked since 1918

The w'l4 cor 15 also on a straight line N-S.
